MUSE ENGINE CASE STUDY

Industrial Startup Seeks Market
Validation and Secures it with
the Aid of **Fulcrum**

CHALLENGE

Muse Engine is a NASA SBIR PHASE 1 funded technology startup that was in need of discovering customers and validating a commercial market for their on-demand, Small-batch injection molding technology.

SOLUTION

In collaboration with Fulcrum, Muse Engine implemented a comprehensive market engagement strategy:

- Targeted Outreach: Focused exclusively on CDMs due to their pivotal role in product development and prototyping.
- Lead Generation: Compiled an initial list of approximately 1,000 potential leads, refined to 186 high-potential contacts after thorough evaluation.
- Performance Metrics: Committed to conducting 400 quality sales activities with the objective of producing 3-6 opportunities.

Market Validated

In a short timeline, Fulcrum was able to generate all 6 qualified sales opportunities thus validating the CDM market with Muse Engine.

On / Off

Fulcrum's model allowed Muse Engine to outsource a critical function without having to commit limited funding to personnel.

Market Awareness

Reached hundreds of leads and verified industry sectors with most obvious interest.
